

The grant funding game:

Strategies that might help your funding applications

William Ghali

Scientific Director, IPH

Overview

- CIHR – general points
- Special competitions vs. open grants
- Choosing a committee
- Priority announcements
- Agencies other than CIHR
- Progress pages
- Response to reviews
- Renewals & rolling of grants
- External reviewers
- Main proposal: miscellaneous suggestions
- U of C internal peer review

The grant resubmission game:

Strategies that might help you tap in
the rebound

Strategic considerations relating to your grant budgets

Strategies that might help your applications
(and/or avoid hurting your applications)

Successful knowledge translation for grant applications

Overview

- The big picture (impactful knowledge?)
- The 'KT section'
- Demonstrating partnerships
- KT science/theory
- KT in your budget and timeline
- The KT context

Reflecting on the big picture

- Impactful knowledge?
- (vs. simple curiosity?)
- Your research enterprise
- Deciding:
 - Go for a grant?
 - (vs. just do it and produce a paper)
- Potential to score a 4.9?

The KT section?

The KT section?

The KT section?

It's not just a section....

The KT 'fabric'

- Weaved through the grant
- Partnerships apparent
- Bidirectional dialogue
- An institutional context
- A societal issue or challenge calling for knowledge
- A multi-faceted dissemination strategy
- And yes...

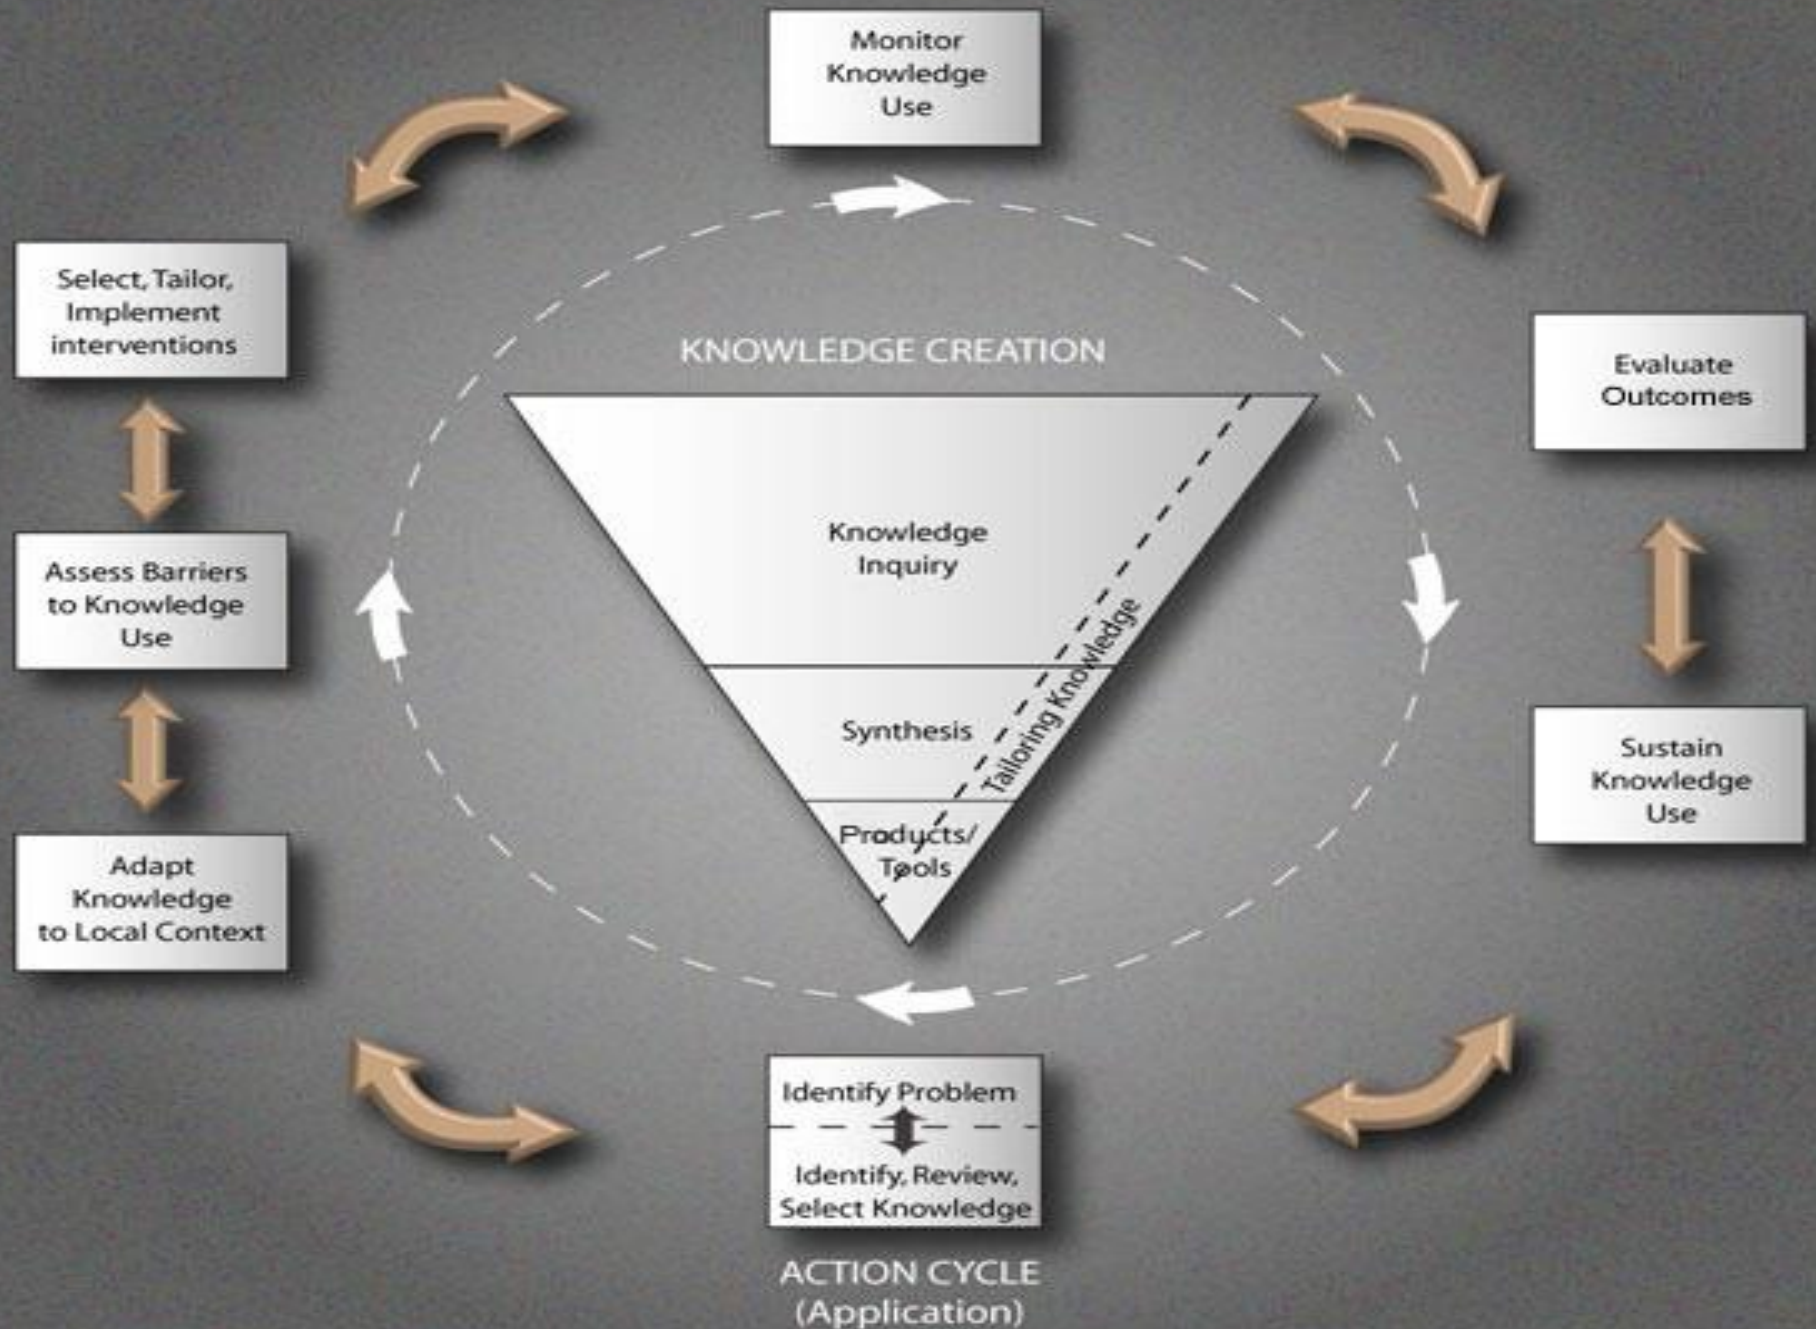

The KT section

Partnerships

- Establish them
- The IPH is here to help
- Consider a formal steering group
- Letters of support
- Decision-maker co-applicants
- Avoid being too local
- Think nationally
- Or globally

KNOWLEDGE TO ACTION PROCESS

KT reflected in budget and timeline

- KT is a priority
- Work not done until KT complete
- Think of Knowledge Dissemination Grants
- Or applications to the KT committee (Open Grants)

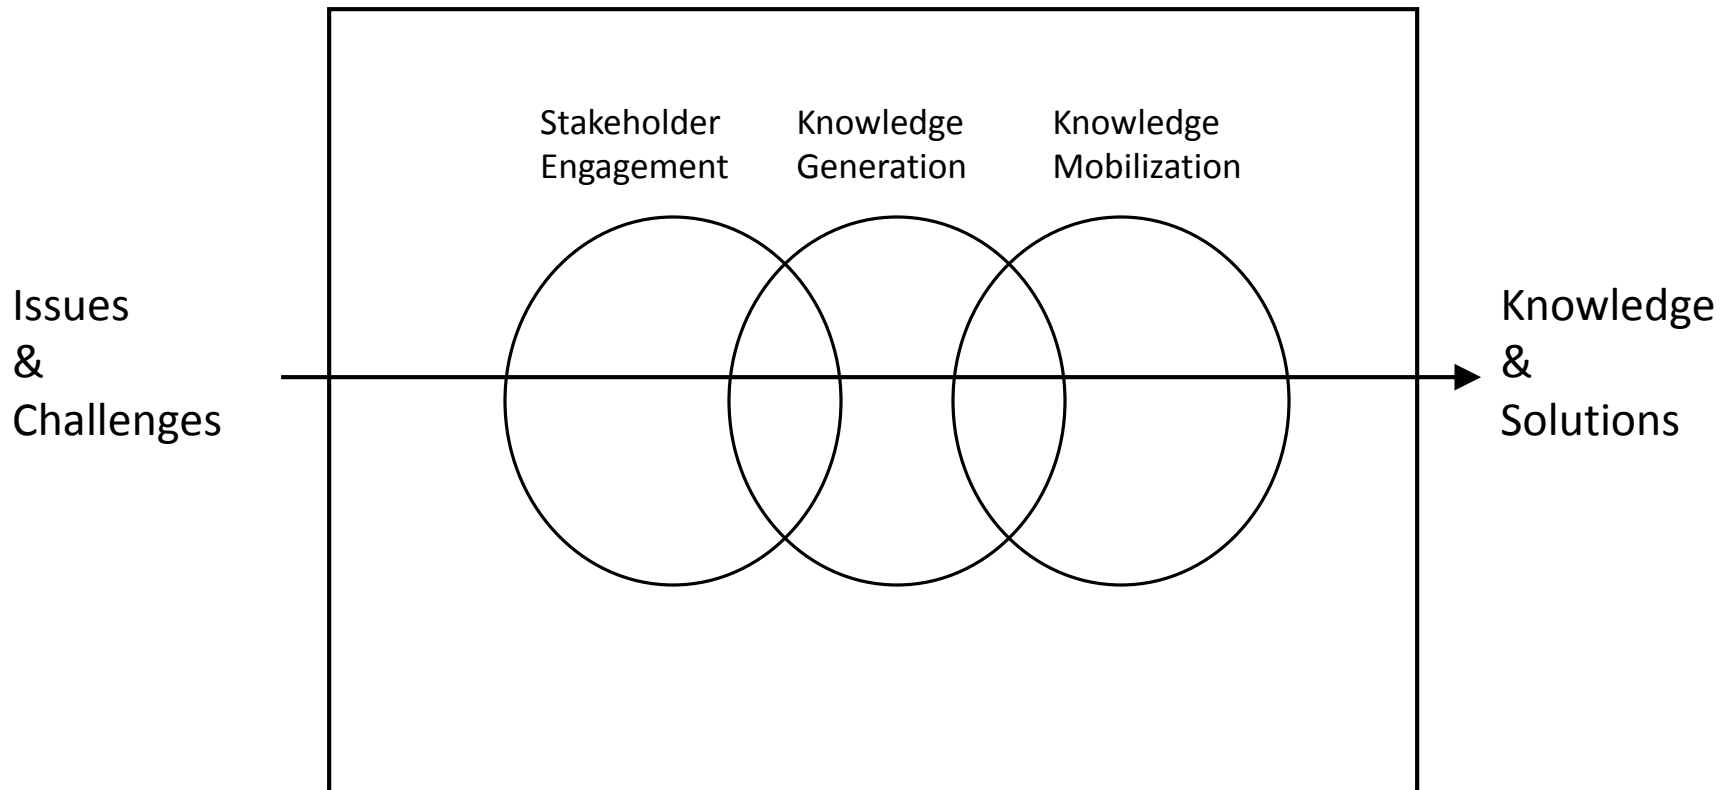

Institutional Context

- Describe your base
- The framework
- The opportunities
- The resources
- The relationships
- The communications team
- The capacity to host forum events
