KT EVIDENCE REPOSITORIES

Rx for Change (CADTH): *Rx for Change* is a searchable database containing current research evidence about intervention strategies used to alter behaviours of health technology prescribing, practice, and use. The intent of this database is to help inform the choice and use of practical, evidence-based interventions.

<https://www.cadth.ca/resources/rx-for-change/database/browse>

KT Strategies Database (KTDRR): The Knowledge Translation (KT) Strategies Database brings together research evidence on Knowledge Translation tools and strategies. Articles address approaches to translating, disseminating, and utilizing knowledge. The KT Strategies Database is a service of SEDL's Center on Knowledge Translation for Disability and Rehabilitation Research (KTDRR) and Center on Knowledge Translation for Employment Research (KTER).

<http://ktdrr.org/ktstrategies/>

KT+ (McMaster University): provides access to the current evidence on "T2" knowledge translation* (i.e., research addressing the knowledge to practice gap), including published original articles and systematic reviews on health care quality improvement, continuing professional education, computerized clinical decision support, health services research and patient adherence. Its purpose is to inform those working in the knowledge translation area of current research as it is published.

Health Systems Evidence-Program in Policy Decision-Making (McMaster University)

“Health Systems Evidence is a continuously updated repository of syntheses of research evidence about governance, financial and delivery arrangements within health systems, and about implementation strategies that can support change in health system. Over time Health Systems Evidence will also contain a continuously updated repository of economic evaluations of health system reforms, and descriptions of health systems.”
